**PANAVISION**

**SUPER PANATAR**

A COMPLETELY NEW, MODERN

*Variable* ANAMORPHIC LENS

# PANAVISION SUPER PANATAR

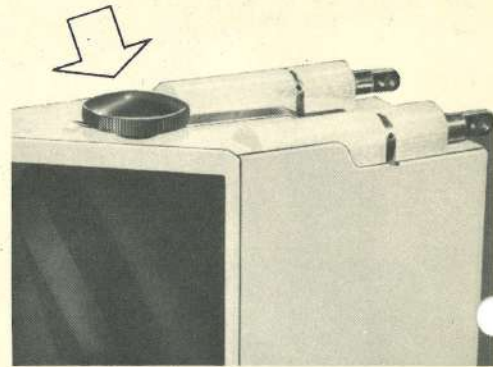

THE *Variable* LENS FOR ALL ANAMORPHIC SYSTEMS

The **ONLY** lens which gives top efficiency for CinemaScope, Vistavision, Superscope . . . all systems . . . plus those yet to be announced.

## THIS IS IT!

With **SUPER PANATAR** you solve all projection problems at once. No matter what aspect ratio is required . . . up to 2.66:1, Super Panatar gives you a perfect picture across the entire screen . . . sharp, clear, in perfect focus with the most brilliant color rendition you have ever seen.

Remember . . . only Super Panatar can give you this perfection with all anamorphic systems regardless of the aspect ratio used!

## • VARIABLE

SUPER PANATAR is the *only* lens which works equally well for *all* anamorphic systems. The adjustment of just one knob—so simple a child can do it—is all that is required to adjust to any aspect ratio from 1.33:1 to 2.66:1.

## • SHARPER & BRIGHTER

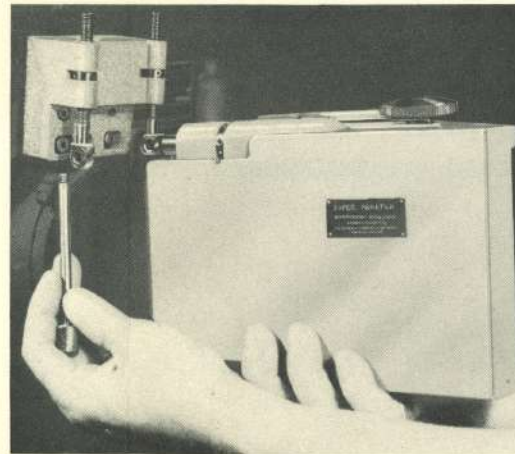

SUPER PANATAR gives the sharpest, brightest pictures you have ever seen over the *full width* of the screen . . . regardless of the aspect ratio in use.

## • SUPERIOR COLOR

SUPER PANATAR's optical formula combined with the finest craftsmanship give the truest color rendition possible. The natural color will amaze you!

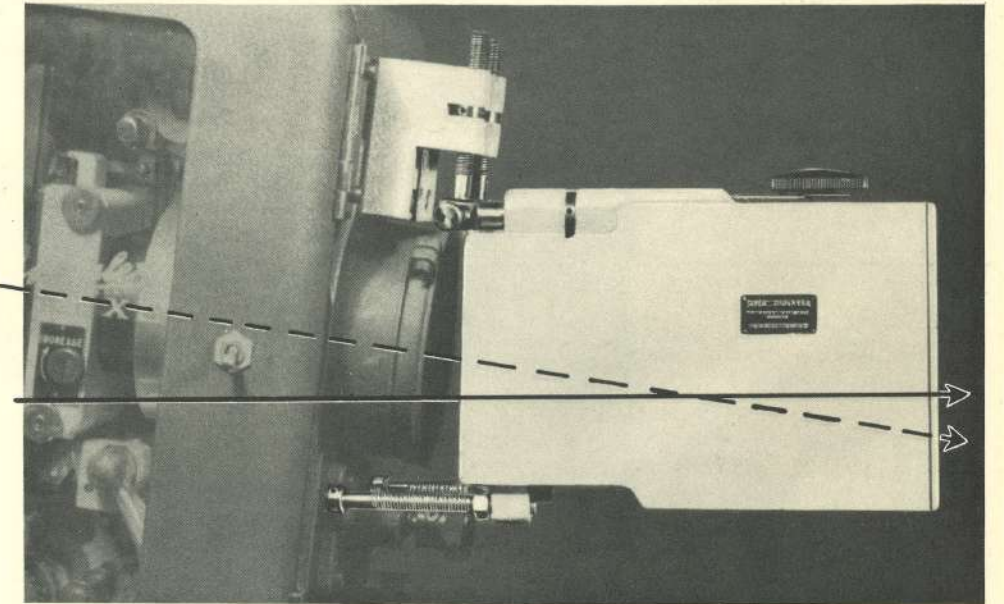

## • SIMPLIFIED MOUNTING

An easily installed mounting plate remains permanently attached to the projector head. The SUPER PANATAR lens is mounted or removed in seconds. It does not have to be removed for the showing of standard pictures. And it fits *all* objective lenses!

## • CORRECTS DISTORTION

Panavision's unique mounting in front of the objective lens permits adjustability which eliminates horizontal line distortion caused by curved screens and excessive projection angles.

## • SUPERIOR DEFINITION

Here again, Panavision's physicists have created perfection in performance . . . absolutely unsurpassed definition.

## • NO FOCUSING

SUPER PANATAR requires *no focusing*. Only the objective lens need be focused in exactly the same way it has always been done. SUPER PANATAR remains *permanently* in sharp, precision focus.

## • EASY TO CLEAN

All exposed parts are easily accessible for quick, simple cleaning.
